

Colocando as iniciais dos nomes dos animais nos locais indicados você vai descobrir o nome dessa linda ave que é muito comum na Amazônia e no Pantanal.

This section contains a word puzzle activity. At the top, there are six circles in a row. The fifth circle from the left contains the letter 'n'. Below these circles are five arrows pointing upwards to the first, second, fourth, fifth, and sixth circles. Below the arrows are five animal illustrations: a toucan on the left, a snake in the middle, a parrot on the right, a turtle at the bottom left, and a spotted jaguar at the bottom right. The puzzle is designed for the student to identify the animals and place their initials in the corresponding circles.
